

Marble Run

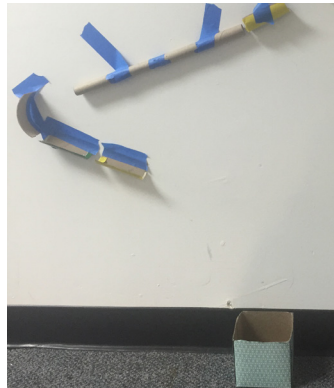

1. Cut the cardboard tubes.

Cut the cardboard tubes in half lengthwise. » You can optionally decorate them with stickers, paint, colored tape, and more before you move on to step two.

2. Tape them to a wall.

Find a blank wall to use. » Starting from the top of the wall, build your marble run track using the tubes and painter's tape. » Experiment with your track design! Try making both long and short stretches, using steep and slight angles, attempting to make the marble "jump" between tubes, etc. It is best to test with the marble along the way to make sure that it stays on the track.

3. Test your marble run!

Place your basket, box, or bowl at the bottom of your marble run path to catch the marble. » Release your marble at the top of the path and watch it zip and zoom!

Supplies

Marbles

Basket, bowl, or box

Painter's tape

Scissors

Cardboard tubes of all sizes

Decorations (optional)
